

*"If you can imagine it, Nadco will make it stick."*

**918**  
**(Shrink Film Splicing Tape)**

**DESCRIPTION:** A 7 mil (175 micron) thick white UV stable polyethylene film coated with a high quick stick, synthetic rubber based adhesive system. The adhesive has excellent shear strength and good high temperature resistance with clean removability from fiberglass, stainless steel and aluminum after long term exposure.

**APPLICATIONS:** Designed specifically for temporary hull attachment and patching of heavy gauge shrink film used in both the marine and manufactured housing industry. Also widely used for preservation sealing of canisters and other containers.

**TECHNICAL DATA**

	<b>IMPERIAL</b>	<b>METRIC</b>
Thickness:	8.2 mils	0.205 mm
Adhesion:		
Peel(PSTC #1)	27oz/in. width	7.6 N/2.5 cm
Shear(PSTC #7)24+hr.	10 psi	69 kPa
Tensile: (PSTC #31)	19 lb./in. width	85.9 N/2.5 cm
Elongation: (PSTC #31)	400%	400%
Temperature Resistance:	175°F	80°C
Minimum Application Temperature:	40°F	4°C
Water Vapor Transmission (WVTR):	<0.3 perms	
Color:	White and Blue
