

"If you can imagine it, Nadco will make it stick."

GLOW
(Photoluminescent Material)

Description: Flexible laminated film coated with permanent acrylic pressure sensitive adhesive and backed with poly coated release liner. Promotional grade photoluminescent material is designed to glow 1+ hours.

Product Data

Nominal Thickness: (Film/Adhesive)	.011" +/- 10%
Release Liner:	.005" +/- 10%
Adhesion Properties PSTC-1 (Modified) Peel Adhesion from Stainless Steel:	72-oz/24 hour dwell
PSTC-7 Shear Adhesion from Stainless Steel: (1/2" X 1/2", 500 grams)	>24 hours
Minimum Application Temperature:	50°F
Color: Emission:	Yellow/Green Yellow/Green
Glow Properties DIN 67510 Xe Lamp 1000 1x/5 min.:	1+ hours Time span necessary for afterglow brightness to diminish to .032 mcd/m ² (100 times the human eye perception limit)
