

"If you can imagine it, Nadco will make it stick."

T188
(2-Mil Kapton)

DESCRIPTION:

T188 series consist of Dupont Type H Kapton film, coated with a high hold, acrylic type, pressure sensitive adhesive and protected with a treated, easy release, paper liner.

CONSTRUCTION:

- Available Backings: 1, 2, 5 mil Type H Kapton Film,
- Adhesive: 2 mil, acrylic type synthetic, solvent resistant pressure-sensitive. The adhesive coating is available on one or both sides of the Kapton Film.
- Release Liner: 4 mil treated paper offering ease of release and removal.

STANDARD PUT-UP:

- (A) Roll Form: All thicknesses are available in split to width rolls up to 18" wide.
- (B) Sheet: All thicknesses are available in cut to size sheets, 18" wide x desired length.
- (C) Die Cut Parts: Die cut parts are readily available to customer specifications.

PRESSURE SENSITIVE ADHESIVE:

Excellent - resists inorganic solution, mild acids, and alkalis, petroleum based oils, greases, gasoline, kerosene, JP-4 fuel and other fuels containing xylol and toluol. Superior common solvent resistance.
