

*"If you can imagine it, Nadco will make it stick."*

## CLOTH FRICTION

### DESCRIPTION

Friction Tape consists of a scientifically compounded pure rubber based adhesive properly calendared and impregnated into the highest-grade cotton cloth. This tape is commonly used for over wrapping low voltage splices, harnessing and cover taping for many mechanical applications.

### FEATURES

Friction tape with superior strength and resistant to abrasion and moisture. A high percentage of pure rubber for maximum elasticity and moisture resistance. Does not fray or unravel.

Meets ASTM 4514-85. This product is ROHS compliant.

### PHYSICAL PROPERTIRES

Insulation Class	80°C
Color	Black
Adhesive	Rubber Resin
Total Thickness	15 mil (.38mm)
Tensile Strength	42 lbs./in.
Backing	Cotton Cloth
Adhesion	14lbs./in.
Elongation	8%
Dielectric Strength	1000 volt

### CROSS REFERENCE
