CLOTH FRICTION

DESCRIPTION

Friction Tape consists of a scientifically compounded pure rubber based adhesive properly calendared and impregnated into the highest-grade cotton cloth. This tape is commonly used for over wrapping low voltage splices, harnessing and cover taping for many mechanical applications.

FEATURES

Friction tape with superior strength and resistant to abrasion and moisture. A high percentage of pure rubber for maximum elasticity and moisture resistance. Does not fray or unravel.

Meets ASTM 4514-85. This product is ROHS compliant.

PHYSICAL PROPERTIRES

Insulation Class	80°C
Color	Black
Adhesive	Rubber Resin
Total Thickness	15 mil (.38mm)
Tensile Strength	42 lbs./in.
Backing	Cotton Cloth
Adhesion	14lbs./in.
Elongation	8%
Dielectric Strength	1000 volt

CROSS REFERENCE

1002.1004.1038

Physical characteristics shown are averages from tests recommended by our own procedures. A particular roll may vary slightly from these averages. The buyer should determine the suitability of his own use.
