

"If you can imagine it, Nadco will make it stick."

7550
(Glo Brite)

Description: Flexible laminated film coated with permanent acrylic pressure sensitive adhesive and backed with poly coated release liner. Safety grade photoluminescent material designed to glow 24+ hours. Product withstands uv-light and does not show significant degradation when used outdoors.

Product Data

Normal Thickness: (Film/Adhesive)	.011 +/- 10%
Release Liner:	.005 +/- 10%
Adhesion Properties PSTC-1 (Modified) Peel Ashesion from Stainless Steel:	72-oz/24 hour dwell
PSTD-7 Shear Adhesion from Stainless Steel: (1/2" x 1/2" , 500 grams)	>24 hours
Minimum Application Temperature:	50°F
Color:	White/Green
Emission Color:	Yellow/Green
Glow Properties: DIN 67510 Xe Lamp 1000 Lx/5 min.	24+ hours Time span necessary for afterglow brightness to diminish to 0.32 mcd/m ²
